

Cave Cats – Leader

Equipment

- Caves A to E
- Laminated cats (Jaguar, Leopard, Ocelot, Puma, Tiger)
- Laminated foods (Fish, Pigs, Racoons, Snakes, Turtles)
- Laminated age signs (2, 3, 4, 5, 7)
- Instruction sheet

Cave Cats

There are five different cats living on the jungle island (Jaguar, Leopard, Ocelot, Puma, Tiger).
 They live in a line of caves (A, B, C, D, E).
 Each cat has a different favourite food (Fish, Pigs, Racoons, Snakes, Turtles).
 Each cat is a different age (2, 3, 4, 5, 7).

Use the clues to work out which cat lives in which cave, what food they eat and their age.

Clues

1. The Puma is the oldest animal.
2. The animal that eats snakes lives next to the animal that eats racoons.
3. The ocelot is twice the age of the jaguar.
4. The 2-year-old and the 7-year-old cannot live next to each other.
5. The animal that eats snakes has a 6 letter name.
6. The Tiger lives to the left of the Ocelot and the right of the Leopard (but not necessarily directly next to them).
7. The Jaguar cannot live in an end cave.
8. The animal that eats fish lives in Cave A.
9. The Puma lives in Cave D.
10. The 7-year-old eats racoons.
11. The 5-year-old eats Pigs and lives in the middle cave.

When you have placed all the cats in the correct caves with their ages and favourite foods show your answer to an activity leader to collect your Tiger Token.

Answers

Cave A	Cave B	Cave C	Cave D	Cave E
Leopard	Jaguar	Tiger	Puma	Ocelot
Fish	Turtles	Pigs	Racoons	Snakes
3	2	5	7	4
